

THE PROCESS

Contact your area safety representative or Eric Johnson to schedule your classes today. We will conduct the classes in one day or over a couple of sessions to complete your six Professional Growth Hours. The training can be a combination of classroom and hands-on instruction.

We can conduct this training at your location if we have 15 or more participants. If you do not have 15 participants, you can invite other utilities in your area for a combined workshop.

Our safety section will complete the required paperwork and submit for your professional growth hours and issue a certificate at the end of the class. As always with Water and Wastewater classes, the participant must be present for the entire class time to receive a certificate.

PLEASE REFER TO OUR FEE SCHEDULE FOR PRICING OR CALL ERIC WITH YOUR QUESTIONS!
